

Smart Lender - Applicant Credibility Prediction for Loan Approval

Team ID: PNT2022TMID19191

Created a Project folder that contains files as shown below:

- We are building a Flask Application that needs HTML pages “home.html”, “index.html” stored in the templates folder and a python script app.py for server-side scripting
- The model is built in the notebook Loan prediction.ipynb
- We need the model which is saved and the saved model in this content is model.pkl
- The templates mainly used here are “home.html”, ”prediction.html”, “contact page.html” “login.php”, “about.html”, ”register.php”, ”bank login.php” “procedure.html”, ”ratings.html” for showcasing the UI
- The flask app is denoted as app.py
- IBM scoring endpoint consists of templates and app.py
